

TEMPERATURE CONVERSION CHART

The kelvin is a base unit in the International System of Units (SI). The Kelvin scale is an absolute, thermodynamic temperature scale whose zero point, absolute zero, is the temperature at which all random motion of atomic particles completely stops. A kelvin is defined as 1/273.16 of the temperature of the triple point of water (exactly 273.16 K, 0.01 °C or 32.018 °F). The triple point of water is the temperature and pressure where liquid water, solid ice and water vapor are all present and at equilibrium.

°C = Celsius aka Centigrade

°F = Fahrenheit K = Kelvin

°C	°F	K	°C	°F	K	°C	°F	K	°C	°F	K	°C	°F	K
